³ Defined as the % of portfolio companies (by fair value) with LTM EBITDA at the time of investment less than \$100m and facility sizes as of each date less than \$300m

⁴ Current Yield at Cost is calculated as annual stated interest rate plus annual amortization of original issue discount and market discount / premium earned on accruing debt and other income producing securities divided by total accruing debt and other income producing securities at amortized cost

⁵ Yield to Maturity ("YTM") at Cost assumes that the accruing investments in our portfolio as of each date are purchased at adjusted cost on that date and held until their respective maturities with no prepayments or losses and are exited at par at maturity. This calculation excludes the impact of existing leverage. YTM at Cost uses the LIBOR curves at each quarter's respective end date. The actual yield to maturity may be higher or lower due to the future selection of LIBOR contracts by the individual companies in our portfolio or other factors. See "Important Notice and Safe Harbor Statement."

⁶ Excludes PIK ("payment-in-kind" interest), revolvers, unfunded commitments, bridges, return of capital, and realized gains / losses

- Well established New Mountain platform provides unique knowledge warehouse and sourcing capabilities
- Differentiated "defensive growth" investment strategy
- High quality and diverse portfolio

Credit Performance

(\$ in millions)

¹ Since inception of predecessor entity in 10/2008 through 9/30/2015

² Determined on a quarterly basis by Management. In addition to various risk management and monitoring tools, NMFC also uses a four-level numeric investment rating system to characterize and monitor the credit profile and expected level of returns on each portfolio investment. Ratings of 1 and 2 indicate the investment is performing materially above, or materially in-line, with expectations, respectively. All new loans are rated 2 when approved. A rating of 3 indicates the investment is performing materially below expectations and risk has increased materially since the original investment. A rating of 4 indicates the investment is performing substantially below expectations and risks have increased substantially since the original investment. Payments may be delinquent. There is a meaningful possibility that we will not recoup our original cost basis in the investment and may realize a substantial loss upon exit. Where it is determined that an investment is underperforming, or circumstances suggest that the risk associated with a particular investment has significantly increased, a more aggressive monitoring of the affected portfolio company will be undertaken

⁴ Realized default loss represents positions that have crystallized losses and no recovery is expected
