Review of NMFC and NMFC Strategy

- NMFC's portfolio is externally managed by New Mountain Finance Advisers BDC, L.L.C., which is an affiliate of New Mountain Capital, L.L.C. ("New Mountain" or "NMC"), a leading private equity firm with approximately \$9 billion of assets under management⁽¹⁾, approximately 100 staff members, and a consistent focus on "defensive growth" business building and deep fundamental research
- NMFC's mandate is to primarily target businesses in the middle market that, consistent with New Mountain's private equity platform, are **quality, defensive growth** companies, in industries that are **well-researched** by New Mountain
 - Sustainable, highly differentiated and competitively protected niche
- Mandate achieved by **utilizing existing New Mountain investment team** as primary underwriting resource; team combines operating executives with financial executives
- Target loan to value ratios typically average less than 50% of both sponsor purchase price and NMC valuation

NMFC Relative Trading Performance – Indexed Total Return

May 19, 2011 (IPO) – March 1, 2013

Indexed Total Return

— NMFC — S&P 500 — S&P 500 Financials — BDC Index⁽¹⁾ — High Yield Index

Credit Market Conditions

- Significant rally in credit since the beginning of the year
 - Dearth of supply from new issuers
 - Expectation of low base rates for an extended period
 - Strong demand particularly from rapidly expanding CLO new issues
 - Stabilization of global economic data
 - Continued equity market strength
- NMFC works to be well positioned to capitalize on volatile markets:
 - NMC and NMFC have **always** proactively focused on defensive, acyclical business models
 - Leverage facilities **not** subject to margin calls

² Determined on a quarterly basis by Management. In addition to various risk management and monitoring tools, NMFC also uses a four-level numeric investment rating system to characterize and monitor the credit profile and expected level of returns on each portfolio investment. Ratings of 1 and 2 indicate the investment is performing materially above, or materially in-line, with expectations, respectively. All new loans are rated 2 when approved. A rating of 3 indicates the investment is performing materially below expectations and risk has increased materially since the original investment. A rating of 4 indicates the investment is performing substantially below expectations and risks have increased substantially since the original investment. Payments may be delinquent. There is a meaningful possibility that we will not recoup our original cost basis in the investment and may realize a substantial loss upon exit. Where it is determined that an investment is underperforming, or circumstances suggest that the risk associated with a particular investment has significantly increased, a more aggressive monitoring of the affected portfolio company will be undertaken

³ The \$5.9m, at cost, refers to the first lien investments in ATI Acquisition Company

² Under GAAP, NMFC's IPO did not step-up the cost basis of the Company's existing investments to fair market value at the IPO date. Since the total value of the Company's investments at the time of the IPO was greater than the investments' cost basis, a larger amount of amortization of purchase or original issue discount, as well as different amounts in realized gain and unrealized appreciation, may be recognized under GAAP in each period than if the step-up had occurred. The Company tracks the transferred (or fair market) value of each of its investments as of the time of the IPO and, for purposes of the incentive fee calculation, adjusts Pre-Incentive Fee Net Investment Income to reflect the amortization of purchase or original issue discount on our investments as if each investment was purchased at the date of the IPO, or stepped up to fair market value. The Company also uses the transferred (or fair market) value of each of its investments as of the time of the IPO to adjust capital gains or losses and unrealized capital depreciation
